Enhance Your Toolkit Summer 2019

Clinicians, medical students, research coordinators, and others who wish to incorporate clinical and translational research into their careers are encouraged to join us for this 3 day introduction to clinical and translational research methods.

Purpose:

Participants will be introduced to methodologies and techniques required to conduct clinical and translational research. At the conclusion of the course participants should be able to:

- Convert research questions into specific aims
- Discuss a range of research methods and study designs
- Explore online bibliographic citation management software and navigate numerous proprietary databases available through the UIC Health Sciences Library
- Explain the ethical considerations of research, including requisite Institutional Review Board (IRB) approval
